## PROJECTS

TITLE	<b>Machine Learning using CCA on Network Traffic Data</b>	<i>Status: Ongoing</i>
GUIDE	Dr. Vijaya Saradhi, <i>IIT Guwahati</i>	
NATURE	Summer Research Project	
DETAILS	By representing network traffic data in different ways and maximizing correlation between these representations (using Canonical Correlation Analysis), we are trying to establish relationships between various features of the data. Ultimately we hope to use these relationships to establish patterns in the data.	
TITLE	<b>Tweet Categorization</b>	<i>Independent Project</i>
DETAILS	Developed a system to classify tweets into categories using the principles of a binary Bayesian Classifier. This when used for the contest Twitminer (organized by IISc Bangalore) gave an accuracy of over 90% and was ranked 26th in India.	
TITLE	<b>Handwritten Digit Recognizer</b>	<i>Independent Project</i>
DETAILS	Developed a system to recognize handwritten digits using knn-algorithm. Used data from Kaggle.com for training and to evaluate performance.	
TITLE	<b>Movie reviews using Sentiment Analysis of Tweets</b>	<i>Independent Project</i>
DETAILS	Currently working on a system to mine the sentiment of tweets on a newly released movie and analyze whether there is a positive or negative buzz on the movie.	
TITLE	<b>Enhancing the kernel of Pintos</b>	
GUIDE	Dr. Sajith Gopalan, <i>IIT Guwahati</i>	
DETAILS	Augmenting the basic Pintos kernel (developed at Stanford, USA) by adding various advanced OS constructs like Process Synchronisation primitives, schemes to run programs in user and kernel mode, file system management and virtual memory with demand paging etc.	
TITLE	<b>2 Pass Assembler Linker Loader for 8085</b>	<b>Python</b>
GUIDE	Dr. Santosh Biswas, <i>IIT Guwahati</i>	
DETAILS	Developed a 2 pass 8085 assembler, linker and loader. It supports various new instructions (not in 8085 instruction set), looping capability and macros, which are converted to the 8085 assembly language accepted by GNUSim8085. It also detects various kinds of errors in syntax and semantics.	

TITLE	<b>SyncBox - A file hosting and file synchronization service</b>	
GUIDE	Dr. P.K. Das, <i>IIT Guwahati</i>	
DETAILS	Led a group of 19 to develop a feature-rich file hosting service which supports automatic 2 way synchronization of files across various computers (Linux) similar to Dropbox. It involved use of Django framework(Python), SSH and few linux utilities.	
TITLE	<b>A Human v/s Computer Game</b>	<b>Java</b>
GUIDE	Dr. Saswata Shannigrahi, <i>IIT Guwahati</i>	
DETAILS	Developed a fully functional (difficult to beat) implementation of the ancient board game Kalaha. This gave me insights into basic Artificial Intelligence (Specifically, Minimax and Alpha-Beta pruning).	

More details, source code and more projects can be seen on my **Website**
